

MassHealth Over-the-Counter Drug List

This page lists the only over-the-counter (OTC) drugs that are covered by MassHealth without prior authorization (PA). All other OTC drugs except insulin vials require PA. Please refer to 130 CMR 406.411(A) and 406.412 (A) (2) for further information on OTC drugs. Insulins that are available without PA are listed in the MassHealth Drug List. All insulins are covered for members at home, in nursing facilities, or in rest homes. The items are listed alphabetically by therapeutic class, then by the generic name of the drug or drug ingredients. In general, MassHealth pays only for generic versions of these OTC drugs, singly or in combination, regardless of strength or dosage form unless otherwise specified. Combination products that contain active ingredients that are not included in this list require PA. Notwithstanding the above, MassHealth may pay for a brand-name OTC product if that product is medically necessary under 130 CMR 450.204. All brand-name OTC products currently covered by MassHealth without prior authorization are listed by brand name, below.
